

As from 1st of January 2013, the contribution is calculated as follows:

## CALCULATION CO2 CONTRIBUTION

### Petrol vehicles

- CO<sub>2</sub> emission known:  $(((\text{CO}_2 \text{ emission in g/km} \times 9 \text{ EUR}) - 768) : 12) \times 1.1920$  with a **minimum of 24.83 EUR per month**
- CO<sub>2</sub> emission unknown:  $(((182 \times 9 \text{ EUR}) - 768) : 12) \times 1.1920 = 86.42 \text{ EUR}$

### Diesel vehicles

- CO<sub>2</sub> emission known:  $(((\text{CO}_2 \text{ emission in g/km} \times 9 \text{ EUR}) - 600) : 12) \times 1.1920$  with a **minimum of 24.83 EUR per month**
- CO<sub>2</sub> emission unknown:  $(((165 \times 9 \text{ EUR}) - 600) : 12) \times 1.1920 = 87.91 \text{ EUR}$

### CNG vehicles

- $(((\text{CO}_2 \text{ emission in g/km} \times 9 \text{ EUR}) - 990) : 12) \times 1.1920$  with a **minimum of 24.83 EUR per month**

### LPG vehicles

- $(((\text{CO}_2 \text{ emission in g/km} \times 9 \text{ EUR}) - 990) : 12) \times 1.1920$  with a **minimum of 24.83 EUR per month**

### Electric vehicles

- 24.83 EUR per month

---

The formulas mentioned above are on an annual basis: you need to divide the outcome by 12 to arrive at the monthly amounts.
